Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a fixed telephony terminal for transmitting and receiving SMS messages.
 - II. Claims 9-14, drawn to a server with a link to the internet so a user can populate the data from a browser.

Inventions 1 and 2 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, claims group I recites multiple detailed limitation of the terminal (e.g. Conversion mean, , SMS sub dresses, telephony directory means. Claims in group II, recites multiple detailed limitation of the server, which required different search inquiry (e.g. link for the internet, a directory database, personal assistance devices). Each group of claims would not require the particulars of the other for patentability. So subcombination II has separate utility such. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to

provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

2. A telephone call was made to attorney Dorini Brian on 4/9/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.
